

JUST GLEANINGS

ACME VILLAGE SCHOOL, TO JOIN WHEATLAND SCHOOL DIVISION

On October 18th the electors of the Acme Village School District voted in favor of joining the Wheatland School Division, and the vote was taken the count showed 41 votes in favor and 5 against the proposal.

ALBERTA WHEAT CROP WILL BE ABOUT 115,000,000 BUS.

A crop survey issued Tuesday by Agriculture Minister D.B. MacMillan showed that Alberta will harvest an estimated 115,000,000 bushels of wheat this year, an increase of 35,000,000 over 1943.

Output production is estimated at 127 million bushels, nearly two million bushels less than the 1943 yield. Production of barley is estimated at 56 million bushels, about the same as last year, and flaxseed is estimated to yield 1,200,000 bushels, a drop of over 2,600,000 bushels from the 1943 figure.

LEGAL ADVISOR TO DEPENDENTS

Soldiers' dependents desiring legal aid regarding his or her personal affairs are advised to apply in writing to the Dependents' Advisory Committee of the Dependents' Board of trustees, headquarters of M.D. 13, announced recently.

The application will then be considered by the board and if it is then thought that the services of a solicitor are required arrangements will be made accordingly by the committee.

APPLE JUICE NOW AVAILABLE

A minimum of 500,000 cases of apple juice fortified with Vitamin C will be available for Canadian consumers this winter, according to a recent announcement by the Wartime Prices and Trade Board, setting maximum prices for the product.

During the past five years all fortified apple juice processed in Canada has been reserved for military needs. The Board has removed all restrictions on tin allocations so that if the 500,000 cases do not cover Canada's apple crop, processors will be free to increase their output.

Apple juice is the only provision for Canada's health needs. Because of the good tomato crop and the government subsidy to canners, there will be large stock of tomato juice.

VOLUME 23; NUMBER 39

CARBON UNIT OVER HALF WAY MARK IN SEVENTH LOAN DRIVE

Co-operation Needed To Raise the \$68,000 Quota

The campaign for the Seventh Victory Loan got away to a good start in Carbon Monday and approximately 50 per cent of the \$68,000 quota was subscribed during the first three days. Mr. S.F. Torrance, unit organizer for this district, reported that up to Wednesday morning \$35,050 had been subscribed to this loan, and that applications are now coming in fairly well.

Active campaigning is now commencing in the country and it is expected that the quota can be reached at an early date if subscribers will come forward and make their applications without waiting to be canvassed. Mr. S.N. Wright is chairman of the local National War Finance Committee, and John Atkinson Jr. is the vice-chairman. The public relations committee is C.H. Nash and E.J. Rouleau, and the Students Union members are Don Gordon, Conna Jukiewicz and Billy Reid.

Canvassers are: Len Poxon, C. H. Nash; Leo Brown, E.D. McKellar, R. Garrett, S.J. Cummings, John Atkinson Jr., J.J. O'Hausser, Jon Bramley, S.N. Wright, and A.J. McLeod.

J. Bertsch and Chris Harsch are canvassers for Twp. 28 S. 23. Buy your bonds from them. While conditions seem to be more favorable to sell bonds this fall than before, due to increased earnings of the farmer, many seem to hold back their savings with the expectation that they may need the money to buy something else later on. If you have ready cash, put it in Bonds, and help bring Victory to much closer, and at the same time you are shortening the time you will have to wait before you will be able to purchase the luxuries you may crave now.

SHOWER FOR BRIDE-ELECT

35 guests were present at the miscellaneous shower held at the home of Mrs. S.F. Torrance last Wednesday evening in honor of Miss Esther O'Hausser, whose marriage took place on Thursday. Mrs. Margaret Fox, Mrs. Edna Hunt, Miss Gladys Little and Miss Violet Pattison were co-hostesses and a very enjoyable evening was spent in games and contests.

Little Shirley Hey, dressed as a bride, presented the gifts to the honored guest in a miniature house decorated for the occasion by Miss Doris Tricker. Refreshments were served at the close of the entertainment.

FIRST GERMAN RADIO-CONTROLLED TANK CAPTURED IN ITALY

The German radio-controlled "tank" used for the first time against the 8th Army at Anzio, has been salvaged by a British recovery crew and examined by Allied experts.

The vehicle, really an explosive carrier, is 12 feet long, 4 feet wide, 4 feet high—slightly smaller than a Bren carrier. A driver takes it as far as he dares then gets out and the "tank" with its load of about 800 lbs. of explosives continues alone, guided by radio. At the target the explosive charge is dropped or slid to the ground, and a time fuse is fixed. The "tank" is then backed to its driver, by radio control.

"NEIL" CUNNINGTON, CARBON OLD TIMER, DIES AT 82 YEARS

Came To Carbon District From Wyoming, in 1903

Another Carbon old timer in the person of Cornelius Cunningham passed away in a Calgary hospital on Thursday afternoon, October 19, following a lengthy illness.

The late Mr. Cunningham was born in Ontario and moved to Missouri with his parents at the age of seven. He was employed in the States in his young years and in 1902 came to Canada with his wife in a covered wagon. In 1903 they came to the Carbon district and homesteaded on the Kneel Hill creek about 2 miles from the present townsite of Carbon, and he had resided here since that date. Mr. Cunningham went into the cattle business quite extensively when he first came to the district, but in later years turned to farm raising, and operated a section and a quarter farm. Deceased was one of the real old timers of the Carbon district and was 82 years of age at the time of his death. Besides his wife, Adela, he is survived by one daughter, Mrs. Percy Smith of Calgary. A son, Joseph, predeceased him in 1941.

Funeral services were held for the late Cornelius Cunningham in Calgary on Monday afternoon at 1:30 o'clock, and a number of Carbon and district residents were in attendance. Rev. R. R. Hinchey of Carbon officiated and pallbearers were: C.H. Nash, Robert Shaw, R. R. Thorburn, Jan. McGill, Wm. Downe and A. Fuller. Interment followed in the Burslem cemetery.

LIFT CONTROLS ON ELECTRIC HOT PLATES AND GRILLS

Although production restrictions on electric ranges and electric cooking plates and grills have been lifted recently by the Wartime Prices and Trade Board, it is not expected that there will be any marked increase in production. Electric ranges and combination coal and electric ranges are not affected by this new order.

MISS JEAN HEATH MARRIED AT PRINCE RUPERT

The paragon of "First United Church" was the scene of the happy marriage Saturday evening of Miss Jean Heath, daughter of Mr. and Mrs. Richard Heath of Carbon, Alberta, and John Edward Adelman. Both are workers at the local shipyard, the former a plater's helper and the latter a blacksmith. Witnesses of the ceremony were Mr. and Mrs. Thomas J. Bittinger, Rev. James A. Donnell officiated.

LITTLE ITEMS OF LOCAL INTEREST

Syd Wright returned Tuesday night from a trip to the Okanagan Valley, where he visited with his brother, Dr. A.J. Wright at Vernon.

Don't forget the John Atkinson Sr. Auction Sale on Monday, October 30. Sale starts at 10:30 a.m.

A miscellaneous shower was held at the home of Mrs. Len Poxon on Monday evening in honor of Miss Sally Schaefer, and about 24 guests were present. Mrs. Cooper and Mrs. Jack Barker were winners of the contents, and gifts were presented to the bride in a box decorated in red and white.

THIRTY MILE POWER LINE IN OPERATION IN SWALWELL AREA

Opening Ceremony Held Last Thurs. Afternoon

Farm homes in the Swalwell district, west of Carbon were lit up last Thursday following the official ceremony to mark the completion of the rural electrification project.

Before a gathering which included virtually every farmer of the 25,000 acre area, company officials and representatives of the electrical manufacturing industry, H. R. Milner, K.C., president of Canadian Utilities Ltd. closed the main switch at the substation, and sent the power surging through the newly-constructed transmission lines.

The Swalwell "Experimental Area No. 1" is the first of three test projects in Alberta under construction to be placed in operation. Other electrification projects are at Olds and Vegreville.

Various items of farm electrical equipment were on display during the ceremony. The electrical manufacturing industry, some of the devices are being made available at the new power users. Rates to be charged in the Swalwell area compare favorably with most towns and villages in Alberta. For the first 30 kilowatt hours the monthly minimum is \$5 and for all power used above the minimum, the rate is three cents per k.w.h.

Farmers of the Swalwell district have not been required to make any capital payment, with the company bearing the complete cost of construction of the system as far as the meter located on a pole in each farm yard.

Invest In Victory

CANADA'S SEVENTH VICTORY LOAN, with its minimum objective of \$130,000,000, comes at a time when there is every reason to believe that the most critical period of the war is well in the past. After five years of wartime sacrifices and restrictions it is natural that the people should be anxious to return to normal conditions as quickly as possible, and that there should be some surprise that such a large loan is necessary at this time. In announcing the new Loan Campaign, the Minister of Finance, Hon. J. L. Riley, went into this matter in detail, pointing out many reasons why Canadians are asked to continue to lend and save not only in the interest of victory, but also to ensure economic stability for this country now, and in the critical period which will follow the final defeat of Germany and Japan.

Still Need For Patriotic Loans

In warning the public against being too hasty in assuming that there is no further need for wartime restrictions, Mr. Riley was repeating advice which has been given by many other officials here in recent months. It is well known that Canada is committed to full participation in the struggle against Japan, and there is as yet no indication that the war in the Pacific will be speedily concluded. In addition, Canada is contributing extensively to the work of the United Nations Relief and Rehabilitation Administration. There are also far-reaching plans for social security measures within the Dominion during the post-war period. It is clear that all these undertakings will call for the expenditure of large sums of money, for patriotic lending on the part of the people here.

Inflation Is A Constant Danger

Another reason why the public is urged to continue to lend and save, lies in the constant danger of inflation. A sudden departure from wartime restraint in spending, would quickly destroy the economic stability which has been so successfully maintained here during the war. In contrast to the chaotic conditions which develop when inflation occurs, the restrictions which have been enforced in Canada have caused relatively small inconvenience, and it is apparent that public co-operation in this connection will be required for some time to come. One way in which this co-operation can be manifested, is in whole-hearted support of the Seventh Victory Loan. The first six loans were generously over-subscribed, and in giving a similar response to the Seventh Loan Campaign the people of Canada will be investing in victory, both on the battlefields and on the home front.

Autumn Coloring

Tells Why Leafs of Trees Turn From Green To Other Colors

What actually takes place when Nature presents her colorful pageant every Autumn is described by Dr. D. J. MacLachlan, professor of botany at the Ontario Agricultural College, who says it can be boiled down to a simple cause—accumulation of sugar.

Autumn coloring, in general, Dr. MacLachlan says, is a result of breakdown processes. In preparation for Winter, a small cork layer forms at the base of each leaf, actually sealing the wound created by the leaf's separation before it breaks off. This cork allows the natural processes in the leaf. The chlorophyll, or green coloring disappears, and yellow, hidden by the green all summer, come into view. Sugar formed in the leaf is prevented by the cork layer from getting down into the plant, and in conjunction with a cyanide complex forms a brilliant red dye.

Deeper shades of red indicate more sugar in the leaf. As the breakdown process continues and the leaf dies, a brown color is formed.—Kitchen Record.

CHRISTIE, BROWN AND COMPANY LIMITED, TORONTO & WINNIPEG

Price Control And Rationing Information

Q.—Our school is situated quite far from town and we would like to serve hot lunches to children by the middle of October. Is it possible to get rationed food for these lunches?

A.—Yes, it is. Schools wishing to serve hot lunches to school children can apply to Local Ration Board for permission to serve rationed food. Arrangements will be made by considering them as quota users. But ration allowances will be given to cover only those children who cannot possibly go home for lunch.

Q.—I live on a farm and previous to the war found a use for every cotton bag that came into my home. I have recently heard that restriction have been removed on the using of used bags. Will you kindly let me know if this is so?

A.—Rural housewives will be glad to know that now the stocks of used cotton bags have increased so that it is possible to restrict them to the removal of tied cotton bags need no longer be returned, and can also be bought for conversion into school supplies.

Q.—May ration commodities donated by members be offered for sale at a high rate?

A.—Yes, organizations may still preserve donated by members but it is necessary to first secure permission from your Local Ration Board.

Q.—Do soldiers' short leave ration ration cards have to be presented to local ration boards when a certain time?

A.—No, they can be presented any time. You probably know that you must serve nine meals before presenting any of these cards.

Q.—How long will Ration Book 4 be kept in use?

A.—All coupons in ration book 4 will expire December 31st. The ration book expiring on the same date. Ration book 5 contains coupons for 50 weeks, so you will have to protect it against damage for a longer time than any of the previous books.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book (the book in which you keep track of your rationing prices) mentioning the name of this paper to the Editor of the Chronicle, 1000 Centre Street, Regina, Saskatchewan, or to the Board office in your province.

"Constipation gone...this easy way"

"I'm delighted to find out about ALL-BRAN for it enabled me to get rid of my constipation woes. It did me no harm, and it never helped me more than it does now. I'm an ALL-BRAN regular." I wouldn't misrepresent this gentle cereal in the world. "If you suffer from constipation due to a sluggish bowels, get KELLLOGG'S ALL-BRAN—as a cereal it has several many advantages. It's a delicious, wholesome cereal, a medicine. Get ALL-BRAN today, at your grocer's. I hardly state, made by Kellogg in London, Canada."

Can Be Dangerous

Housewives Should Be Careful About Mixing Different Cleaners
There is a lesson for housewives in the curious case of the Birmingham woman who was nearly killed by poison gas while scrubbing her bath, states the London Daily Mail. It is: Never mix two different kinds of household cleaners.

Birmingham City Analyst revealed the cause in his quarterly report, stating that the misadventure resulted from the combined use of two proprietary brands of household cleansers.

The housewife sprinkled two ounces of a powder cleaner on her bath, and then, anxious to get the surface as clean as possible, added about half a pint of a liquid.

There was lots of fazing, but the woman had lost her sense of smell in childhood and did not realize that the gas was being given off. The gas was chlorine, which was used by the Germans in the last war.

The woman fainted, came round again, crawled into the garden, and eventually recovered under medical treatment.

ADDED TO TROUBLES

Notified by the telephone office he had a collect telegram waiting, a financially embarrassed sergeant at Camp Roberts, Cal., borrowed \$130 due to read this message from his wife:

"Please send \$10 home immediately."

Sparks from a piece of chromium steel held against a grinding wheel come in flower-like bursts; sparks from ordinary carbon steel come in simple, straight lines.

Power Of Science

Our Aim Must Be To Improve Men And Not Machines

The power of science is producing day by day amazingly perfect machines which appear almost able to take the place of human intelligence. Of this the recently completed "automatic" sequence-controlled calculator is an outstanding example. It is of vital importance to remember that machines however excellent are only machines, and that the human being who copies them or endorses to imitate them in any guise is preparing for a machine-made life.

The man who is not a machine will read and reflect. He will reason and ask questions. He will turn to the world's wisdom in order to get help for the elevation of the plane on which his own life is to be passed. If a practical plan can be worked out by which all training shall rest on liberal education, even though limited as a foundation, we shall be opening the door toward progress in the world such as we have never yet been able to achieve. We shall not turn from the education of men to the making of machines.

Assurance must be given that our educational system will do all that is possible to make liberal education in some form, however limited in the future, the foundation of the ideal of all training of any kind. This will reduce to a minimum the number of skilled human machines who have never risen to be really men. Our constant aim must be men and not machines.—Address by Dr. Butler at Columbia.

Girdles The Globe

India Has Powerful Short-Wave Station At Delhi

Ten times as powerful as any other All-India Radio short-wave station and giving a beam signal capable of girdling the globe, a new transmitter at Delhi has been broadcasting a 200-hour program service since May 1. The 100 kw. Radio's 400 kilowatt-meter short-wave transmitter. This new high-power transmitting station is located outside Delhi on a site extending over 300 acres of land.

RECIPES

DRUM STICKS MAKE AN ENTRANCE

One of the most delicious ways to serve round steak, veal slices or pork cuts is in the role of Mock Drum Sticks covered with a golden crisp coating of breadcrumbs and crumbs. The use of a crisp cereal in virtually all dishes calling for fine crumbs is a cooking shortcut that busy homemakers endorse. The toasted cereal flakes roll quickly and easily to crumbs of any desired consistency, and the cereal is always available.

Mock Drum Sticks (your butcher may be persuaded to wrap slices of meat around the skewers for you) are dipped first in the crumbs, then in slightly beaten eggs and milk to which seasonings have been added, and finally, a second time in corn flakes crumbs. The Drum Sticks are broiled quickly in hot fat. A small amount of water is added, they are covered tightly and baked in a moderate oven (350 degrees) about one hour or until tender.

Mock Drum Sticks

1 1/2 lbs. veal beef or pork steak, six skewers cut thin
2 cups corn flakes
1 egg
2 tablespoons milk
teaspoon salt
1/2 teaspoon and spread around all four bases for her home. Credit to the barracks, it took the biggest platter in the mess to hold the stack as it lay a bed of salad and French fries. Major Bren, herself, carried in the platter and with fitting ceremony presented it to the lucky private.

FOR DOG OWNERS
It is unfair to the dog to permit him to become a tramp. Sooner or later he will be run down by an automobile, stolen, or possibly poisoned. It is also unfair to one's neighbor. Dog-ownership involves something more than buying a license, feeding a dog and providing it with a place to sleep. It calls for thoughtful, kindly supervision and treatment of the dog for the benefit of the rights of others.—Halifax Herald.

ON YOUR FEET ALL DAY?

JUST PAT ON SLOAN'S FOR QUICK RELIEF FROM ACHING FEET

SLOAN'S LINIMENT

A delicious salad dressing can be made by combining a cup of cream, cheese, 4 tablespoons mayonnaise, 3 tablespoons catsup or chili sauce and 1 cup chopped olives. Serve on head lettuce accompanied by plenty of crisp, energizing crackers. It furnishes a light, but filling luncheon.

SMILE AWHILE

Young Donald had told his favorite uncle that his mother was very funny about some things. When the uncle asked why he thought so, Donald said: "Well, when we have mine pie for dinner she asks me whether I like some, but when we have spinach, she just gives it to me."

"What is a mother?" "A man who owes money." "And what is a creditor?" "A man who thinks he's going to get it back."

The head of the firm was frowning over a letter. Calling for his chief clerk, he said: "That typist—you certainly didn't engage her on account of my grammar?" "Grammar," said the other. "When you were emphasizing the importance of grammar—well, I thought you said 'grammar'!"

The sergeant was equipping a recruit with a uniform. The trousers fitted perfectly, the coat might have been made for him and the cap was just right. "Man alive!" cried the sergeant, "you must be deformed!"

Father: "So you've been fighting again, have you? Then you go to bed without supper, young man." Freddy: "All right, dad, I've only got two teeth left anyhow."

Joe: "What's become of the Hiker's club?" Jim: "Oh, it disbanded. It was getting too hard to persuade passing motorists to pick us up and give us a lift."

Uncle George: "This is the baby, eh? I used to look just like him at that age. What's he crying about now?" Little Niece: Oh, Uncle George, he heard what you said.

A lady had been looking for a friend for a long time without success. Finally, she came upon her in an unexpected way. "Well," she exclaimed, "I've been on a perfect wild goose chase all day long, but thank goodness I've found you at last!"

The Return Of The Nascopie After A Very Successful Trip High Above The Arctic Circle

THE Nascopie came back from the North, to report "a fine trip" and everything well with residents of Canada's outposts high above the Arctic Circle. The Hudson's Bay Company ship completed her three-month, 12,000-mile jaunt with hardly a hitch and right on schedule. That was a far cry from the terrible ice conditions of last year which forced the temporary closing of Fort Ross on the southern coast of Somerset Island and delayed the veteran icebreaker almost a month.

Fort Ross was reopened this trip, when the 22-year-old Nascopie crashed through to the site with comparative ease. It was the first time in three years that she had been able to reach Fort Ross, the port having been closed and the post manager and his assistants brought out by plane after the Nascopie had failed to run in supplies last year and in 1942.

Captain F. T. Smellie, O.B.E., of Winnipeg and Major D. L. McKee of Ottawa, superintendent of Arctic control for the Dominion government, agreed that "everything went fine" this time and that the 4,200 white and Eskimo residents of the north were "in good condition."

The Nascopie carried 35 passengers when she completed her trip, including a two-month-old baby, two other children and an Eskimo dog. Most of the passengers were Hudson's Bay Company and Royal Canadian Mounted Police personnel returning home after they had been relieved at their northern posts.

Only the baby and the dog were catching their first glimpses of the Arctic. The baby was born at St. Lawrence, and the other seemed impressed. Amid the shrouded impressions as the icebreaker was wharfed into berth, the baby cried and the dog yawned.

The baby was the infant daughter of Cpl. W. E. Hastie, R.C.M.P., and Mrs. Hastie. Cpl. Hastie, from Balcarres, Sask., had been stationed for four years within the Arctic Circle, and Mrs. Hastie, formerly of Moncton, N.B., joined him there two years ago.

The other two children were Marion, eight, and Jean, six—daughters of Dr. and Mrs. William N. McKee of Kingston, Ont., who came out with their parents after two years at Pangnirtung, on the southeast coast of Baffin Island. Dr. McKee, representing the Department of Lands and Mines, was medical officer at Pangnirtung.

Only once did the Nascopie have trouble crashing her reinforced bow through the ice to an outpost. She failed on her first attempt to enter Cape Smith and her outward trip, but made it on the way back after visiting Churchill and a number of smaller posts. At Cape Smith she dropped Mr. and Mrs. W. A. Heslop, who had been flown out of Fort Ross the year before.

Three days after she left Montreal early in July, the Nascopie was the scene of an emergency operation, when Terry Buckley of Montreal, 16-year-old cabin boy, was stricken with appendix trouble. Dr. George Hooper of Ottawa performed a "highly successful" operation in the ship's dispensary, using instruments of Dr. L. B. Amyot, of Schenectady, N.Y., dental officer aboard.

Young Terry later was left behind at Cartwright, Labrador, and from there was flown home.

Plan New Uniform

British Army Will Not March Into Berlin In Battledress

Mass production of a new victory uniform for the British army—to be known as "V-U"—will be started shortly, it was disclosed, so it may be ready when Allied troops stage their expected victory march through Berlin.

The new uniform will not be of the battledress type, and military tailoring experts describe it as "the smartest thing ever."

Out from khaki cloth, the tunic will have lapels and shiny plastic buttons and will be worn with collar and tie. The trousers are a non-crease style.

In Ottawa, Canadian army officials said descriptions of the new British uniform appeared to correspond closely to the walking-out uniform introduced in the Canadian army two years ago.

EVERYBODY'S JOB

So many people are asking what the Government is going to do for the returned man, what are we, ourselves, as citizens, going to do to help provide jobs for all? Surely we have responsibilities individually as well as collectively, says the *Lethbridge Herald*.

In Tibet, rice is a luxury, eaten only by the wealthy.

Neither Too Young Nor Too Old

Ante, the youngest of them all, does his daily drench on his hospital cot on the island of Via, Yugoslavia. "Attending" a mine and sabotage school run by the British on the island young Yugoslav patriot Ante got hold of a hand grenade. He hurled the grenade at some chickens—almost blowing his own foot off. This photograph was made as the young chicken growler, veteran of the battle of the barnyard was well on the way to recovery.

AIR CARGOES

During the first six months of 1944 about 22,000,000 pounds of air cargoes were flown over the global aerial freight system. About one-third of the total cargoes carried were strategic raw materials for the U.S.S.R. and the United Kingdom.

A small Bermuda fish covers itself with sand when it goes to sleep.

USED FOR MEDICINE

Witch hazel was first used for medicinal purposes, but is now widely used in beauty preparations for the face and hands. It is derived from the bark of a North American shrub.

Medieval surgeons used wine as an anesthetic, giving it to patients until they passed out.

Royal Family Visit R.C.A.F. Bomber Group In Britain

His Majesty The King, accompanied by The Queen and Princess Elizabeth, recently visited many of the stations of the R.C.A.F. Bomber Group Overseas to make presentations of awards to many officers and men and to congratulate aircrew and groundcrew personnel on the excellent record they had established during thousands of bombing trips over Germany and the occupied France. In the top picture The King and Queen chat with Group Captain F. A. Sampson, Toronto and Ottawa, and Air Commodore R. A. McBurney, Ottawa, left to right respectively. Air Marshal L. E. Broadner, Ottawa, Air Officer Commanding in Chief of the R.C.A.F. Overseas, extreme left, and Princess Elizabeth look on. Lower left, The Queen talks to Flight

Sgt. Black, Montreal, during an inspection by Her Majesty the Queen and men at one of the bomber stations. Behind the Queen, left to right, are Vice-Marshal C. M. McEwan, Montreal; Air Commodore C. R. Benson, Bowmanville and Winnipeg, and Princess Elizabeth. Lower right: The King has just made the presentation of the Moore Squadron plaque to Wing Commander W. Plesance, D.F.C. and Bar, Calgary, former C.O. of the Squadron. Left to right in the picture are The King, Squadron Leader D. Hagerman, D.F.C., Saskatoon; Squadron Leader J. Stewart, D.F.C., Montreal, and W.C. Plesance.

A Comprehensive Program Of Research By Famous Scientists To Unlock Secrets Of The North

THE Arctic Institute of North America, with a 12-man board of governors, plans a comprehensive program to unlock the secrets of the Arctic Circle, so long neglected. The board is carefully balanced between executives of big business and world famous scientists. Six members represent Canada and six the United States. They plan to tackle the job in a big way when the year is over.

Could Do With More

But Canada Will Have Planes For International Aviation

Canada's position in the supply of airplanes for post-war international aviation is considerably better than that of most other countries, officials said in commenting on a Vancouver report which said the United States alone had a sufficient supply of planes.

Officials at Ottawa said while Canada "could do with more planes" she would have sufficient to meet her own domestic and international route requirements if the war did not end immediately.

Lancaster bombers, now being turned out in considerable numbers at Victory Aircraft, Malton, Ont., are regarded as having some peacetime possibilities and now are in service on a Trans-Canada Airlines trans-Atlantic route.

Canada, is however, pinning her major hope on the big Douglas DC-4 planes which are being built at Montreal and are scheduled for delivery late next year.

A new type of ice cream scoop makes it possible to fill cones clear down to the bottom.

While the governments of the interested countries will be asked to co-operate, particularly in the matter of proper mapping of the land of the Eskimo, the bulk of the financing will come from private sources, foundations and other funds built up for scientific research.

The Institute will have the co-operation of universities and there is no doubt there will be keen competition to join research parties in the Arctic and sub-Arctic when the Institute's program begins to function.

The grim, silent Arctic holds many secrets and never before has there been such a universal desire to delve into them.

For example, the magnetic pole is supposed to be in the Boothia Peninsula, but scientists know that it shifts about. How far does it shift, how fast and why?

In an outline of suggested activities decided on at a meeting in Montreal on Sept. 8, the Institute proposes to make a history of marine submergence and emergence of North American Arctic lands. Enormous areas have been recently and perhaps repeatedly submerged. The results of this study are important for geophysics, plant and animal ecology and anthropology.

Then there are the northern lights and their effect on radio and other communications. There will be expeditions to study them and their related phenomena.

A study of the glaciers of Alaska, Arctic Canada, Ellesmere Island will be made with special emphasis on the ice cap over a large part of Greenland.

Those interesting people, the Eskimos, will be studied. Did they really come over from Asia and when? Then again, why does the Eskimo never have cancer? There has been some study given to that already.

There is a wide field for study of the animal life of the Arctic. Its principal crop is white fox pelts and white furs reach their peak of abundance approximately every five years. Science will be asked to explain this cycle.

Air travel will give the institute great help. Constant touch with field parties will be simple by radio. In fact, it is going to be much easier to pry open the secrets of the Arctic now than a generation ago when comparative puny efforts were accomplished with so great hazards and so much hardships.

This Week's Needlework

by Alice Brooks

Add a beanie and bag, crocheted in wool, to your wardrobe to give your Fall clothes the proper companionship. Done in single crochet.

A narrow ruffle gives the right finish. Make sure to match various outfits. Pattern 7254 has directions for hat and purse stitches.

To obtain this pattern send twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg, Newspaper Union, 175 McLeod Avenue, E. Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

"Because of the slowness of the mails delivery of our patterns may take a few days after purchase."

HELICOPTER RESCUE

The first official helicopter rescue took place when a coast guardman settled his "flying windmill" on an east coast sandbar and picked up a marooned boy.

Armistice Has Been Accepted By Bulgarians

LONDON.—Bulgaria has accepted preliminary armistice terms from Russia, Great Britain and United States, Moscow radio announced.

The Moscow announcement said one of the preliminary conditions was that all Bulgarian troops in Greece and Yugoslavia must be evacuated within 15 days.

The move was apparently a speedy result of Moscow conditions between Marshal Stalin and Prime Minister Churchill.

Simultaneously, a Cairo broadcast heard here by the Associated Press said Bulgarian troops in Greece had already received their orders to withdraw.

Tripartite military commission under the chairmanship of a Russian representative will check and supervise the evacuation of Bulgarian troops and officials from the occupied territories, the Moscow announcement said.

Evacuation of the Greek and Yugoslav territories—which Bulgaria obtained in her former partnership with Germany—must start immediately.

In the British House of Commons the Minister of State, Sir Richard Law, said that a limited evacuation had been started by the Bulgarians from the territories which, he said, they fled and robbed from the Allies.

The Russian announcement indicated final armistice terms which Bulgaria will not be settled until she fulfils the preliminary terms of withdrawal.

Allied governments, through the European advisory commission, have been considering these armistice conditions since Sept. 9, when the Russians ended hostilities against the Bulgarian army after a one-day war.

The Russians have been pushing Bulgaria's round-up of Nazi officials and pro-German elements who had launched the country on a road of territorial aggrandizement with Hitler's help in 1940.

DARING DEEDS

Canadian Army Engineers Earn A Place In Fame

WITH THE CANADIAN ARMY IN HOLLAND.—In the dark terrain that was the River Rhine on the September night when Britain's 1st Airborne Division was evacuated after nine days and nights of fighting, a field company of Canadian Army engineers earned a place in fame by evacuating some 2,500 of them across the river to safety.

The Canadians, under Maj. Michael Tucker of Montreal, rescued nearly 90 per cent. of all the men brought out under a constant hail of enemy fire and in the most harrowing feat.

Outstanding in this operation was Cpl. George I. Robinson of Regina and Sapper David McCready of Calgary.

"I was never prouder of a bunch of men," said Maj. Tucker. "Mortar and shells were falling all around them but they never faltered; they just unloaded and headed right back into it all for the other side."

Maj. Tucker had special praise for Cpl. George Robinson who led a section in constructing the bridge necessary for the operation, was responsible for the delivery of heavy storm boats to the launching sites and afterwards commanded a boat on six trips before it was put out of commission.

WAR ON JAPS

Report That Siberian Bases May Be Used By U.S.

LONDON.—The Daily Express, in a special despatch from Washington said Marshal Stalin is reported to have pledged Siberian bases to the United States as soon as the war ends in Europe.

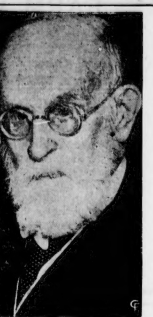

The Express is published by Lord Beaverbrook, regarded as one of Russia's staunchest supporters as well as a strong advocate of closer Anglo-American relations.

The story added: "Russia is not expected to take an active part in the war to defeat Japan."

BAN WILL BE LIFTED

LONDON.—The veil of anonymity, drawn over all the roads and footpaths, towns and villages of Britain directly after the fall of France, to battle the German invader, will be lifted officially when Home Secretary Morrison revokes the "removal of direction signs order."

Sir William Dies

Sir William Mulock, Canada's "grand old man" died at his home in Toronto, in his 102 year. He was formerly chief justice of Ontario and a former postmaster-general of Canada.

Key Position May Decide On Length Of War

LONDON.—The speed with which the 1st Canadian army clears up the Scheldt estuary may decide whether the war in Europe will be won this year or will continue through the winter into next spring.

Antwerp, with harbor facilities comparable with Liverpool, is the key to the supply problems of Lt.-Gen. Crerar's Canadian army and Lt.-Gen. Dempsey's British 2nd Army and once its undamaged docks are available to Allied shipping only weather conditions will delay a break-through into the northern German plains.

British military observers have kept a close eye on the Canadian progress along the coast in northern France and the Low Countries, realizing that despite the non-spectacular role assigned to Gen. Crerar's Canadian, British and Allied troops, in the final analysis they may decide when the war ends.

The Germans are extremely sensitive along their northern and north-western flanks where, it is estimated at headquarters of Field Marshal Montgomery, 21st army group commander, they have drawn up 150,000 men—the equivalent of nine full-strength infantry divisions and five armored divisions—to fight the battle of Holland.

GENERAL'S TRIBUTE

Canadian Brigade Told That British Learned Much From Them

FLORENCE, Italy.—The general commanding the 12th British corps told Canadians of the independent 1st armored brigade that most of the British corps learned on tank and infantry co-operation "was learned from you, and we owe you a great debt of gratitude."

The tribute came in response to a corps toast made by a Vancouver brigadier at a dinner given in honor of his recent award of the D.S.O. for leadership of the brigade.

WESTERN CORRIDOR

Want Short Cut For Motorists In British Columbia

VICTORIA.—Premier Hart announced he will look into possibility of obtaining a corridor through the United States connecting Rossland and Grand Forks in British Columbia to provide an all-year highway route in this southern interior area of the province.

At present motorists must cross the Cascade mountains with two summits which are almost impassable in winter.

If the United States should give B.C. less than 20 miles of territory in northern Washington state it would be possible for Canadians to motor from one side of the province to the other any time in the year without the necessity of going through the U.S. customs and immigration inspection.

Mr. Hart said he told business people of the interior area he would request the Dominion government to discuss it with Washington.

VISIT CANADIANS

Legion's League Club Inspected By The King And Queen

OTTAWA.—King George and Queen Elizabeth renewed acquaintances with several Canadians in Edinburgh recently, when they visited the Canadian Legion's Canadian League club there.

Met by Maj. J. H. Wallace and Senior Superintendent H. A. D. Mills, of Moose Jaw, Sask., Their Majesties inspected the club. Practically every Canadian they met in the club recalled having taken some part in the ceremonies attending the Royal Visit to Canada in 1938.

Gives The Victory Sign

Prime Minister Winston Churchill and Mrs. Churchill are shown upon their arrival in England on the Queen Mary. They had just returned from the Quebec conference with President Roosevelt. According to the prime minister that V for Victory sign he gives may not be a reality in the fight against the Germans before 1945.

NOW IN BERLIN

Italian Gold Reserve Transferred To Germany Says Bank Governor

ROME.—Nichola Introna, governor of the Bank of Italy, testified that the Italian gold reserve was consigned to the Germans by his predecessor, Vincenzo Azzolini, who is on trial for his life.

The gold was transferred to Berlin this year by agreement between the Fascist regime of Mussolini and the Nazi government, the 77-year-old witness said. Azzolini is on trial on charges of collaboration.

Introna said about 50 tons of gold was taken to Berlin from Portofino in February and that German orders to remove the remainder to the Nazi capital were being discussed early in June.

"I have no doubt it all has been transferred to Berlin," he said.

WEST COAST BASE

Establishment Of R.A.F. Transport Base Will Be Discussed Soon

MONTREAL.—Aviation officials from the British commonwealth who will meet here later this month will discuss the establishment of a R.A.F. transport command base on the Pacific coast, it was learned here.

The proposed base would serve the Pacific war zones much as the airport at Derval, Que., has served the European war.

It was learned that creation of the base would not curtail operations by the R.A.F. transport command but would involve an expansion of personnel.

Size of the base will be considered at the conference and Patricia Bay at Victoria and Vancouver airport are rumored as possible sites.

Commander-In-Chief

Here is a new portrait photograph of Gen. Dwight D. Eisenhower, commander-in-chief of Allied forces in the European theatre of action.

Says Trade With Britain Will Be Vital To Canada

NEW YORK.—Trade Minister MacKinnon said in an article appearing in the New York Journal of Commerce that the condition of the United Kingdom after the war may affect the extent to which Canada will be able to sell her goods in a market which has been the "sheet-anchor" for the sale of many products sustaining the economy of both eastern and western Canada.

The minister said that the "triangle" of Canadian-United Kingdom-United States trade had worked to the advantage of Canada over many years. The United Kingdom bought more from Canada than she sold, while Canada bought more from the United States than she sold.

After the war, a commercial world in which the position of the United Kingdom had vastly changed must be faced. This raised serious questions for Canada.

Unless Canada could find means of continuing her trade with the United Kingdom, her capacity to do business with the United States might be affected.

A TEN-YEAR PLAN

Ducks Unlimited (Canada) Will Spend \$200,000 On Canadian Projects

CALGARY.—W. C. Fisher, Calgary, was re-elected president of Ducks Unlimited (Canada) and O. Leigh Simpson, Vancouver, chairman, at a general meeting of members held here.

It was decided to adopt a 10-year plan calling for expenditure of \$2,000,000 on Canadian projects. Tom Mann, Winnipeg, general manager, was instructed to draw up the plan.

The executive body of the organization is to be expanded from the present 20 directors to 30, the new directors being chosen by those already in office, it was decided.

Next year's meeting of the organization will be held in Saskatchewan.

Buy War Savings Stamps regularly.

Must Restore Poland As A Great Nation

WASHINGTON.—President Roosevelt said that Poland must be "reconstituted as a great nation," and told a group of Polish-American leaders that "world opinion is going to back up that objective."

The White House issued an exchange of remarks between Mr. Roosevelt and the leaders of the Polish American congress after the congress delegates presented him a memorial urging that Poland's territorial integrity be preserved.

"You and I are all agreed that Poland must be reconstituted as a great nation," the president told the head of the Polish American congress, Charles Romo, of Chicago.

"Of course we should all bear in mind that nobody here has accurate information about anything that is going on in Poland. Even I, as president of all the information that is available, am not fully informed of the whole story."

"The broad objective which we all accept is that of a united world where world opinion is going to back up that objective—not only to reconstitute Poland as a strong nation, but also as a representative and peace-loving nation."

NEW MINING FIELD

Development North Of Great Slave Lake Is Predicted

EDMONTON.—Miner Minister T. A. Crerar said in an interview on arrival here that an important new mining field is in the making north of Great Slave Lake in the Yellowknife country. He predicted an "immense development in the north country and the whole valley of the MacKenzie in the next 25 years."

Accompanied by Dr. Charles Campbell, deputy minister, Mr. Crerar conferred with Maj.-Gen. W. W. Foster, special Canadian commissioner for northwest defence projects, and he visited Elk Island and Jasper National parks and the McMurray oil sands. He intends also to pay a courtesy call on Premier E. C. Manning and Lieutenant-Governor J. C. Bowen.

OUTPUT IS LARGE

Canada Has Built 137 Merchant Ships Since War Started

OTTAWA.—Canadian shipyards have constructed between 3,000,000 and 3,500,000 disbursement tons of merchant shipping since the war began of which 2,500,000 tons remain under Canadian ownership the Canadian shipping board announced.

In figures prepared for Trade Minister MacKinnon the board revealed merchant ships, built since the war and actually being operated by Canada, at present number 137, including 10,000-ton freighters and 3,000-ton tankers disbursement.

About 300 freighters of 10,000 tons have been built in Canadian yards.

POPULATION DOWN

British Columbia Is Gradually Getting Rid Of Japanese

VANCOUVER, B.C.—George Collins, general superintendent of the British Columbia security commission, said that 414 Japanese have left British Columbia for eastern Canada since the beginning of 1944.

This reduces British Columbia's Japanese population at the first of this month to 15,642.

Since 1941 some 7,000 B.C. Japanese have left B.C. and now are living in other parts of Canada.

SHORTEN LINES

German High Command Speaks Of Having To Lose Ground

LONDON.—Lt.-Gen. Karl Dittmar, spokesman for the German high command, voiced what may be the signal for Nazi armies to retreat to Germany's borders.

In his weekly broadcast, Dittmar said, "It is essential for us now to realize that at present no aspect is more important for us than the utmost shortening of our lines."

NAZIS KILL CZECHS

NEW YORK.—The massacre of Lidice has been repeated in two more Czechoslovak villages, the Czechoslovak information service in London has announced. On Oct. 4, the hamlets of Solana Rama and Hutilek, in Slovakia northeast of Prague were obliterated by the Nazis and their inhabitants were slaughtered, the information service reported.

Bonnie, beautiful husky brought back from the Arctic on R.M.S. Nasaspic, is held here by crewman Peter Kreclo of Montreal.

Grace Reeves, matron of the Church of England Mission hospital at Pangnirtung, is pictured as she arrived in Montreal on the Nasaspic.

OUR COMPLETE SHORT STORY—

A Wife's Place

By ETHEL BEDFORD

McClure Newspaper Syndicate

"But, dear!" invariably I call my husband "dear" when we argue, although I doubt that it ever has helped — just because we have had this place in the country I don't see why I have to stay here when you are in town having a good time.

"A good time!" Henry is a mechanic at changing the subject right under your nose. "That's all you know about my job, Adam."

I know Henry has a tough time, a trying time, an expiring time. I've heard him describe his work often enough to know his phrase by heart.

I had picked the wrong phrase and couldn't tell him I had not been referring to the work at his desk. There is a mental desk, where every wife has been told her husband labors at night, which he sets up so conveniently at bars, cafes, supper clubs, moonlight cruises, etc. I meant that one.

"What I do know about is my job here," I said. "I've worked at it four summers, compelling facts on house guests, sunburn, fallen arches, mosquitoes, relatives, pin money."

"I've missed one this summer," I said. "I've missed one this summer."

"Henry, I'm all packed to go back to New York with you tomorrow."

"Are you out of your mind?"

"Maybe," I said. "But I'd rather live in town with you the rest of the summer — and commute to the country weekends."

"Why do you think we have this place in the country?"

"There are a lot of answers to that one."

Henry walked out of the dining room ahead of me. We went into the living room where, spread on the table under the light, were photographs we had taken that week.

HERE'S MY FEED PROBLEM

I want to get more egg production from my laying hens.

HERE'S THE ANSWER

Be sure you have culled your flock and that you are managing them carefully. Then if you have plenty of feed, grain, mix your own laying mash by using "Miracle" Laying Mash Supplement. This Supplement will give your farm grains all the necessary elements the hen needs to produce more and better eggs. "Miracle" Laying Mash Supplement is tested for food value.

ASK FOR
"MIRACLE" FEEDS

MECCA
OINTMENT
"BURNS, SORES, GUILDS, ETC."

"It certainly does," laughed George, opening Henry's cigarette box. "Let me see that pink box of yours, will you?" Martha asked me. "I don't bring mine."

"Naturally," I said, but she didn't notice. As I opened my bag, which had been so neatly packed, and pulled out the box, I noticed a look of triumph about Henry. Bright as an aurora!

Anyway, I have next summer to look forward to . . .

Tall Enough

Valuable Work

Making Over Old Furniture Into Something Useful

"Making something out of nothing is the latest brain wave of that energetic and enterprising Patriotic Corps group in Winnipeg," say the directors of Women's Voluntary Services, Department of National War Service.

In the firm belief that a dud can be put to practical use again many W.V.S. members are getting out saws, hammer, paint brushes and going to work. An old fashioned golden oak buffet, mirror removed and feet sawed off becomes a shining red and white kitchen cupboard; heavy old gilt picture frames take a dose of light coloured paint and backed with plywood become eye-catching coffee tables with folding trestles for legs.

"Syrup jugs or odd shaped bottles become washable water bottles. An old jelly jar lid painted the same colour as the stopper of the jug, covers the accompanying drinking glass. Refrigerator sets are made from large cold cream jars. Lamp bases are made from old cracker tins, pitchers, etc., etc."

"The Patriotic Salvage Corps" four shops in Winnipeg sell everything from dolls to dishpans and the attractive "something out of nothing" created by volunteers have a ready sale. Proceeds from these shops go to a list of charitable institutions as long as your arm," the directors concluded.

Flax in Britain

Big Progress Made In Production During The War Years

Enormous progress has been made in Britain's flax production during the war. Since 1914 production costs have been halved while output has been quadrupled. Flax yield has risen from 3½ per cent. to just under 8 per cent. Today, if factories are working and approximating 600,000 acres are under cultivation by nearly 6,000 farmers.

SERVICE FOR SOLDIERS

More than 2,600 used razor blades are being rehashed daily by a Lahore firm. This is one of the economy measures which the army in India has introduced; soldiers return their used blades when issued with fresh ones.

The watermelon has been cultivated since ancient times.

Auto Tires

Automobiles Are In Need Of Careful Attention These Days

The faithful family chariot, taking Dad, Mother and the kids to town on Saturday nights for the weekly shopping, rates the very best of care to keep it rolling.

Automobiles today need as much careful attention as any farm implements or stock. This is true, especially of the tires for slow leaks in the tires may cause a flat, or worse still, completely ruin the tire.

Three simple tests suggested by motor experts should ward off such disaster:

Make certain that the valve caps have been screwed on finger-tight and that each cap has a washer. Before adding air to a tire, test and record the pressure.

Check the variations in tire pressure. Marked differences in pressure indicate leaks, the experts claim, and tires showing abnormal loss of air should be removed for immediate inspection and repair.

This Week's Pattern

By ANNE ADAMS

A refreshingly new neckline, on a ladies shirtwaister, makes Pattern 4656 first choice for Fall wear. Optional contrast for yokes and collar.

Pattern 4656 is available in women's sizes: 34, 36, 38, 40, 42, 44, 46, 48. Size 36 requires 3½ yds. 30-inch fabric.

Send twenty cents (20c) in coins (stamp cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newsprint Union, 176 McDermott Ave. E., Winnipeg, Man. "Because of the slowness of the mail delivery of our patterns may take a few days longer than usual."

A necklace of beetles' eggs is used as a token of love by natives of the Solomon Islands.

Binder Twine

Farmers Have Been Supplied With Adequate Quantities

Although three used in manufacturing binder twine has been in short supply since the war began, farmers have been supplied with adequate quantities, states the Current Review of Agricultural Conditions in Canada. That is the price has been maintained at the same reasonable level—9 cents per lb. wholesale. Only one grade of twine, Wartime Standard, running 500 feet to the pound and containing 12½ per cent. jute, was manufactured in 1944. Although somewhat larger and softer than the best pre-war grades, it has been reasonably satisfactory. In the fourth year of the last war, twine prices rose to 25 cents per lb. wholesale.

COAL MINING IN BRITAIN

The proportion of mechanically-cut coal in Britain has risen during the war from 59 per cent. to over 70 per cent. Mechanical conveying of coal has risen from 54 per cent. to 68 per cent.

Needs Further Tests

Canadian Research Workers Announce New Substitute For Blood Plasma

Four Canadian research workers have discovered that polyvinyl alcohol may be used as a substitute for blood or blood plasma in treating certain types of shock cases, says an article in the current issue of the Canadian medical journal. The article, by Dr. N. W. Hoopes, Capt. Lawrence Ruttle, R.C.A.M.F., Dr. Leverage Williams and Dr. Ward Smith of the Universities of Western Ontario and Toronto, recommends further testing and warns that so far only laboratory work and a few clinical experiments have been carried out.

WOULD BE GREAT BOON

Common colds, influenza, pneumonia and other airborne diseases may possibly be cured by conditioning indoor air with an invisible anti-glycol vapor made from triethylene glycol. The odorless, non-inflammable and inexpensive vapor can be distributed uniformly through the air by a duct and fan system.

Firestone
EXTRA VALUES

Are more important NOW
than ever before

Extra Values You Get
Only in Firestone Tires

Vulcanic Rubber—Extra protection against weather checking and wear.

Gum Dipping—Each tire cord is encased against friction and blow-outs.

Clear Grip Tread—Thousands of grooves provide extra protection against skidding.

Safety-Lock Cord—Tightly adjoined together for extra strength.

Most Miles Per Dollar

Firestone tires have always been noted for their extra values and consistent high quality that mean longer wear, more safety and greater value. And, just as you would expect, it is Firestone that today is the pacemaker and pioneer in developing new materials, new methods and new machines that have resulted in tremendous advancements in tire design, construction and performance.

With new tires so hard to get it is more important than ever to get the best tire that money can buy with your tire ration certificate . . . and that means Firestone . . . because Firestone tires stay safer, longer.

NOW AS ALWAYS . . . MOST MILES PER DOLLAR
